Solid Polycarbonate

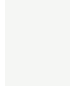

What is polycarbonate?

Solid polycarbonate is a high-performance thermoplastic known for its exceptional strength, clarity, and versatility. Its outstanding properties make it ideal for various applications. Key advantages include:

- Extreme Durability & Impact Resistance – Stronger than glass for enhanced safety Light Transmission
- High Light Transmission – Provides excellent natural illumination Versatility
- Versatile Applications – Suitable for roofing, carports, greenhouses, and more
- Superior UV Protection – Blocks harmful UV rays and prevents yellowing
- Excellent Chemical Resistance – Ensures long-lasting performance in tough conditions

Color Selection

	Clear 	Mints Grey 	Opal 	Blue/ Grey 
Light Transmission	93%	49%	43%	19%
Heat Reduction	0%	52%	62%	47%

Profile Selection

Size available: 3mm*700mm*15m, 3mm*700mm*8m, 4mm*1.2m*12m, 4mm*1.2m*7m
